## **DETAILED ACTION**

### ***Response to Amendment***

1. The present Office action is made in response to the Pre-Amendments filed on 12/21/01 and 4/11/02.

It is noted that in the first Pre-amendment of 12/21/01, applicant has amended claims 1, 3-10 and 12, and in the second Pre-amendment of 4/11/02, applicant has added a new set of claims, i.e., claims 13-40, into the present application. As amended and newly-added, the pending claims 1-40 are subjected to the following restriction/Election.

### ***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species (I) shown in figures 1-2 which species directs to the use of a rotatable/selectable prism system for selecting light coming directly or indirectly from a first light source (1) or light from a second light source (18) wherein the prism system is separated from a main beam splitter for combine lights from a specimen and from a display;

Species (II) shown in figure 3a which species directs to the use of a prism system for combination/addition light of a light source (18) and light provided directly from a second light source (1) wherein the prism system is not rotatable/selectable and separated from a main beam splitter for combine lights from a specimen and from a display;

Species (III) shown in figure 3b which species does not have a second light source and does not have a prism system separated from a main beam splitter for combine lights from a specimen and from a display.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is not any generic claim(s).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. A telephone call was made to Andrew F. Knight on 11/21/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Q. Nguyen whose telephone number is (703) 308-4814. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew A Dunn can be reached on (703) 305-0024. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-7722.
